

TEE CONSTRUCTION

Tee boxes are played by all golfers on every hole. They can become the most scrutinized area of your golf course. US Pitchcare has specific tools to remove built up thatch layers and easily dispose. Utilizing self leveling dual plane laser systems, we can manipulate any surface to promote surface drainage as well as leaving a consistently smooth surface to play off of. We follow this work by regrassing with premier varieties of short grass as well as surrounding rough areas. Leaving a new environment to start your golf hole!
